

CSPL

Excel in **LINUX** Education

Training centre of Excellence

A Division of Comptrix Systems Pvt Ltd

&

International Information & Communication Technology Council
(IICT Council)

**ACADAMIC PARTNERSHIP PROGRAM
(APP)**

CSPL is a training division of Comptrix System Pvt. Ltd. which recognizes the potential and caliber of students. Its not only a training center but also a common roof to bring out an excellent breed of students totally rich in Linux environment. We train students on different flavors of Linux so that when students come out of this center they are immensely knowledgeable to resolve or satisfy any query put upon them. We at CSPL provide excellent trainers from various companies to teach students.

International Information and Communication Technology Council (International ICT Council) is a non-profit organization formed by academicians, industry practitioners and professionals of the ICT industry internationally. Members include practitioners from all levels in broad range of ICT industries. It is designated for heaving the skills, professionalism and morality of members. The Council initiates alliances between members towards the development of the industry and channels communications of different areas.

Comptrix System Pvt. Ltd. is a Registered Training Service Provider (RTSP) of International ICT Council. We are the only one to provide International ICT Councils Global certificate.

By realizing the varying needs of current IT market, CSPL has started providing training / workshops and seminars on latest technologies and timely updates for such a huge knowledge based industry.

Vision:-

Given the high demand for skilled Manpower, India can become a Global Source for Talent. However the country requires a Strong Collaboration between the Private, Public Sectors and Educational institutes and Universities.

Campus Connect:-

At the college level,we have a Campus Connect program which is part of our talent Transformation Group initiative to work with Engineering and Science colleges to pro actively bridge certain skill gaps even before the student joins the company.

CSPL motivates the students to undertake industrial training,summer/winter internships in reputed industries to work with research and development teams.

The problem of finding talent is expected to come into greater focus as Industries such as IT, Next Generation Telecommunications, Research, BPOs, Hardware, Health Care, Travel and Tourism grow further.

“Most students fail to make a mark. They have a degree ,but are not employable. They lack technical and soft skills,we must think about,”

- said Kiran Karnik ,Nasscom president India.

Although India's higher educations system contributes around 3,50,000 engineers and 2.5 million university graduates annually to the workforce,at any given time five million graduates remain unemployed.

A Program will focus on the Technology Events and Discussions by bringing the Top Notch IT Consultants, Technology Officers, and IT Experts in College Campus.

Choosing the right training strategies, methodologies and technologies can have a significant impact on the level of acceptance, knowledge retention and overall performance of end-users. The work-shops will provide market benchmark information, training technologies, and methodologies along with the best practices to gain system proficiency, improve business performance and knowledge retention while reducing overall training costs.

Training At CSPL :-

Our specialization lies in the following areas of IT training services .

Certified Course In Embedded System Design(CESD)

Sr.No.	Contents
1.	Certified Course In Embedded System Design

Modular Training Courses

Sr.No.	Courses
1.	Advance Linux / Unix Environment
2.	Linux Kernel Programming
3.	Device Driver Programming
4.	Embedded Linux System
5.	Basic C Programming
6.	Dismantling C-compiler [C/C++ under Linux/Unix]
7.	Mobile Computing (Symbian OS)
8.	Java (core + advance + J2ME)
9.	OOMD (UML)
10.	Very Very Advance Linux [V2AL]
11.	Network protocols (SNMP v1,2,3 ..etc..)

Career Training Courses

Sr.No.	Courses
1.	Comprix Advance Linux Certificate of Administration. (CALC).
2.	Comprix Advance Certificate of Security / Hacking. (CAcS).
3.	<u>Certified Course In Embedded Systems.</u>
4.	Higher Diploma in Comprix Certified Engineer. (HDCE). (Semester I + II + III + IV)
5.	Higher Diploma in Linux Driven Engineering. (HDLDE). (Semester I + II + III)
6.	Advance certificate of Linux System Driver Developer (CLSD)
7.	Advance Certificate of Perl / Php/ Python Programming (AcPPP)
